

SOUTH CAROLINA PUBLIC LIBRARY

ANNUAL STATISTICAL SUMMARY

FY 03

2004

MEMO TO: Public Library Directors and Trustees

FROM: James B. Johnson, Jr., Director

SUBJECT: Public Library Annual Statistical Summary, FY 03

DATE: April 2004

The development and implementation of long range plans for providing quality library service to the community is essential if libraries are to succeed in the future. South Carolina Public Library Annual Statistical Summary, FY 03, is one of several tools that can provide valuable information needed for the development of a successful plan.

The South Carolina Public Library Annual Statistical Summary, FY 03, has been significantly revised. It still includes information about each library, with totals, averages and medians indicated where applicable; comparisons with measures from South Carolina Public Library Standards, 1998; and output measures. This year data variables have been ranked for each library and latest available population figures have been used for per capita computations.

Primary information, as submitted by each public library in the FY 03 Annual Statistical Survey, was used in all computations. Latest population figures have been used for per capita computations. FTE staff computations are based on a 40-hour workweek.

CONTENTS

S.C. Public Library Standards

Pages 3-6

FY 2003 Public Library Staffing, Collection, Collection Expenditure, Hours of Service compared to Public Library Standards 1998.

Output Measures for Public Libraries

Pages 7-14

Circulation Per Capita, In-Library Material Use Per Capita, Library Visits Per Capita, Program Attendance Per Capita, Reference Transactions Per Capita, Registration Per Capita, Turnover Rate

Data (Green Section)

Pages 15-20

Data and ranking of FY 2003 information submitted by South Carolina Public Libraries

Analysis (Yellow Section)

Pages 21-24

Per capita, per unit, and other comparisons and ranking of FY 2003 data submitted by South Carolina Public Libraries

NOTES:

- (1) Operating Income from all sources. Excludes non-recurring revenue.
- (2) County/tax appropriation, municipal tax appropriation and other local tax revenue for operation.
- (3) FTE calculations are based on a 40-hour work week beginning with FY 93.
- (4) Books only. Turnover rate is based on ration of total print volumes and total print circulation.
- (5) Beginning with FY 03 per capita calculations are based on latest population estimates.
- (6) The Horry County totals at bottom of each page include data for the Chapin Memorial Library and the Horry County Library.

* S.C. Public Library Standards, 1998

Standard: The library meets or exceeds the following for size of its materials collection: Basic - 2.5 vols/capita, full - 3.5 vols/capita, Comprehensive - 4.5 vols/capita (calculating based on latest population estimates)

Standard: The Library withdraws an average of 5% of the collection annually in order to maintain a collection that meets the community needs.

* S.C. Public Library Standards, 1998

Standard: The library is open during hours that are based on community needs.

Standard: The library offers a variety of weekday, evening, and weekend hours at all locations. Percent of weekend service hours:

Basic service - 15%, Full service - 30%, Comprehensive service - 40%.

Output Measures for Public Libraries

The challenge facing South Carolina public libraries is to achieve excellence in a rapidly changing environment. The analysis of organized data collected over time is an effective method to use for evaluating current public library services and for planning future services to meet the needs of library users.

There are several publications available to assist libraries with planning, measurement, and evaluation.

- **THE NEW PLANNING FOR RESULTS**
- **MANAGING FOR RESULTS, EFFECTIVE RESOURCE ALLOCATION FOR PUBLIC LIBRARIES.**
- **PLANNING FOR RESULTS, A PUBLIC LIBRARY TRANSFORMATION PROCESS.**
- **PLANNING AND ROLE SETTING FOR PUBLIC LIBRARIES.**
- **OUTPUT MEASURES FOR PUBLIC LIBRARIES**, second edition.
- **OUTPUT MEASURES FOR PUBLIC LIBRARY SERVICE TO CHILDREN** by Virginia A Walter.
- **SOUTH CAROLINA PUBLIC LIBRARY STANDARDS, 1998.**
- **STAFFING FOR RESULTS**

As librarians and trustees use data to evaluate and plan, a number of points should be kept in mind:

Libraries, even in communities of similar size, have varying funding patterns and community expectations for service, therefore the data should be analyzed in terms of the library's mission, goals, and objectives.

There are no "right" or "wrong" scores for output measures. One performance measure alone cannot tell a complete story. Output measure scores should be interpreted in context with each other and with the library's overall service program and budget.

Changing a library's output measure scores are usually not done overnight. Changes usually require work over an extended period of time.

All population figures used in computing the output measures were based on the latest census data available.

CIRCULATION PER CAPITA

Circulation Per Capita represents the annual circulation of all types of library materials outside the library. It relates the number of items a library circulates to the population of the community served. It can be thought of as representing the average number of items checked out in a year by a member of the community. It is one output measure of the community's use of the library. A high score on this measure indicates heavy use of the library's circulation materials. A low score may indicate several things: For example, (1) the library's collection may not meet the community needs or interests; (2) community residents may be unaware of the library's resources; or (3) the library may have an extensive collection of non-circulating materials.

FACTORS THAT INFLUENCE THIS MEASURE:

- + Library circulation or acquisitions policies, loan period, fines
- + Special programs – prizes, reading programs, etc.
- + Community awareness of library services
- + Library hours of service
- + Number of library users
- + Age, condition and breadth of the library's collection
- + Physical arrangement and convenience of the library facility

IN-LIBRARY MATERIAL USE PER CAPITA

In-Library Material Use Per Capita relates the number of materials of all types used within the library to the population of the community served. Use of this measure creates a more complete picture of services to the public than using circulation information alone.

FACTORS THAT INFLUENCE THIS MEASURE:

- + Increase or decrease in the number of reference questions
- + Increase or decrease in seating and study space
- + Number and arrangement of hours of service
- + Library acquisitions and collection development policies
- + Number of library users
- + Physical arrangement of the library facility

It per capita is one measure of the community's use of the library. A high score on this measure may be associated with a high reference use and may indicate that users tend to spend time in the library using non-circulating materials. A low score on this may indicate a library where people stop to pick up materials to take home and do not stay long.

LIBRARY VISITS PER CAPITA

Library Visits Per Capita relates the number of people visiting the library to the population of the community served. It can be thought of as representing the average number of times a member of the community visits the library. It is often closely related to circulation, in-library use of material, and program attendance.

FACTORS THAT INFLUENCE THIS MEASURE:

- + Library hours of service
- + Community awareness of library service
- + Availability of library parking
- + Special library programming
- + Library acquisition and collection development policies
- + Convenience of location of library facilities

PROGRAM ATTENDANCE PER CAPITA

Program Attendance Per Capita relates the annual number of people attending programs to the population of the community served. It is calculated by dividing the number of people in the audience at all programs held during the entire year by the population of the service area. It measures use of library services not reflected by other measures. Some libraries rely heavily on programming to attract certain user groups.

FACTORS THAT INFLUENCE THIS MEASURE:

- + Number and type of programs offered
- + Community awareness of library service
- + Involvement of community members in program planning
- + Physical arrangement and convenience of library facilities

REFERENCE TRANSACTIONS PER CAPITA

Reference Transactions Per Capita relates the number of information contacts (a staff member uses information sources) to the population of the community served. This measure indicates the average number of times someone seeks library staff assistance in using library information sources. It measure relates strongly to the goals each library has set for meeting the service needs of its community. A low **Reference Transactions Per Capita** with a high **Circulation Per Capita** may indicate a library used mostly for borrowing materials. A low **Reference Transactions Per Capita** with a low **Circulation Per Capita** may mean a low level of overall library use by the community. A high **Reference Transactions Per Capita** and a low **Library Visits Per Capita** may mean that a large proportion of library users are asking reference questions.

FACTORS THAT INFLUENCE THIS MEASURE:

- + Community awareness of library services
- + Physical arrangement & convenience of the library facilities
- + Training and scheduling of library staff
- + Age, condition and breadth of the library's collection
- + Library hours of service
- + Library acquisition and collection development policies

REGISTRATION AS A PERCENTAGE OF POPULATION

Registration Per Capita relates the proportion of the people in the area served who are currently registered as library users. **Registration Per Capita** is calculated by dividing the number of registered borrowers by the total population of the library's legal service area. An accurate count of registered borrowers should be maintained by removing inactive borrowers from the registered count. A registered borrower count is considered invalid if this has not been done in the last three years. It indicates the percentage of the library's potential users who have demonstrated an intent to borrow materials from the library by registering for a card. If the library has not updated its registration figures within the last 3 years this measure is of questionable value.

FACTORS THAT INFLUENCE THIS MEASURE:

- + Convenience and location of library facilities
- + Community awareness of library services
- + Library acquisition and collection development policies
- + Library hours of service

TURNOVER RATE

Turnover Rate measures the activity of a library's collection, indicating the average annual circulations per physical item in the library collection if circulation had been spread evenly throughout the collection. It is the annual circulation of per volume (book) in the library collection. This measure relates strongly to the goals each library has set for meeting the service needs of its community. A library which emphasizes the circulation of popular reading materials will have a higher **Turnover Rate** than a library which emphasizes subject breadth in its collection and has an extensive reference collection.

FACTORS THAT INFLUENCE THIS MEASURE:

- + Circulation policies – loan period, fines
- + Library acquisitions and collection development policies
- + Special programs – prizes, reading programs, etc.
- + Community awareness of library service
- + Library hours of service
- + Number of library users
- + Age, condition and breadth of the library's collection
- + Physical arrangement & convenience of the library facilities
